From M. to P.

Well P.

A big thank you. In our country there are 429 cases of Covid19 in our province two cases tested (positive?). Health workers raise awareness on the radio. We are monitoring, but with the war that has resumed in our region it is difficult to comply with medical advice. We hope that we will find the treatment and that it will not have too many new infections. The whole world is upset.

Also what worries us the (*name of a marauding men*) (maybe this is the name of the militia group?) resumed the war. They kill many people with the bladed weapons. They attack in several villages, they burn the houses those who flee take refuge in churches, classrooms, in host families with a large crowd that really scares us of Covid19 contamination.

It is God who keeps us, the government is blocked because of the Covid19, no travel to the provinces, there is no way to deploy enough soldiers to defend the population.

We stand firm through prayer and the conviction that God is with us so we are alive.

I greet you with all my wishes from the Risen One.

M.

A note to us from P.

The situation does seem very dire on many levels...

She appreciates your concern and that of all the Dominicans. She knows that at least they are not forgotten in their plight.

Love,

P
